SUMMARY

Web and Systems Developer specializing in scalable web applications, business process automation, and landing page development. Experienced in modernizing manual workflows, improving operational efficiency, and implementing secure systems. Skilled in API integration, network administration, and infrastructure security, with a focus on delivering practical technology solutions that drive business growth.

WORK EXPERIENCE

WEB AND SYSTEMS DEVELOPER, Astra Group of Companies, INC. **October 2025 - Current**

- Developed a web-based rewards system for the company's food and beverage business to increase customer engagement, encourage repeat visits, and drive business traffic.
- Migrated procurement processes from Google Sheets to a centralized web application, improving data consistency and implementing role-based access control to protect sensitive information.
- Developed landing pages for multiple company businesses to strengthen brand credibility, improve online visibility, and expand digital reach.
- Developing an integrated POS system with QR code ordering to reduce staff workload, streamline order processing, and minimize order inaccuracies.

INTERN, Advanced Infinit Technology Solutions, INC **March 2025 - June 2025**

- Spearheaded the modernization of payment kiosks by migrating data interactions from direct SQL queries to secure, scalable API integrations using Laravel and VB.NET.
- Revamped and optimized the kiosk microcontroller circuitry, achieving enhanced energy efficiency and reduced hardware costs.
- Contributed to the development of innovative features and functionalities for a web application built on Laravel, elevating user experience and system performance.

EDUCATION

Bachelor of Science in Information Technology **August 2021 - August 2025**
UNIVERSITY OF MINDANAO
- Davao City, Philippines

SKILLS
